

Let's Make a Dinosaur's Egg

• Let's make a model of a dinosaur's egg

Materials

plaster(150g)
Balloon (Direct: : about 20cm)
2 Paper cop
Big mayonnaise container
Disposable chopsticks
Scissors
Water(80ml)

✿ Making dinosaur's egg ✿

1 Stretch and inflate a balloon to stretch easily.

2 Put the water(80ml) into a paper cup then put a plaster.

3 Mix them and put it into the mayonnaise container.

4 Put the balloon to a lid of the mayonnaise container.

5	Put the plaster in a balloon slowly.		
6	Twist the mouth of the balloon many times. Then release mayonnaise container from the balloon and close it.		

It is important to twist and close hard it.

7	Swirl it slowly until it become hard		
8	After it hard, cut the mouth of the balloon and release the plaster.		

🌸Progress🌸

- Let's try to change the size and shape.
- Let's color it.

💡Information

- 💠 It refer to science for children (Seibundo shinkousya) 1987. Vol10 pleasant school construction.
- 💠 When the plaster got hard, if the one part of it became thick, it will be easy to break..
- 💠 You should try this experiment in the place that you can be dirty.
