

# Let's Make Seaweed Specimen

We can see various kind of sea creature in a stony shore in summer. And there are many kinds of seaweed. Let's make a seaweed specimen.

## Materials

- Seaweed
- Vessel (like as shown in the picture)
- Drafting paper
- Plastic sheet
- Newspaper
- Bleached Cotton (Old T-shirts or shirt)
- Thick books
- Board
- Clear sheets

## How to do

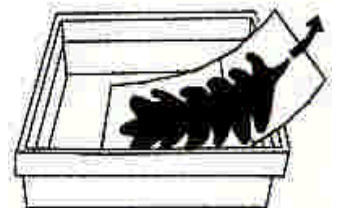

- 1 Collect seaweed .
- ※ Seaweed can be separated into 3 colors (RED, BROWN, GREEN)
  - ※ You have to collect with an adult.

- 2 Soak seaweed in water for a minute.

- 3 Put seaweed on the drafting paper with put on plastic sheet and remove the paper slowly.

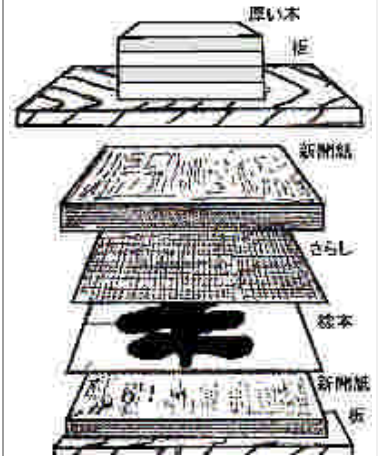

4

Drain off the water from the drafting paper and put the bleached cotton on it.

Tuck them in newspaper.

Put thick book above the newspaper as shown in the figure.

(Change the newspaper 3~4 times per days)

※ If the seaweed are thick, increase the time to change the newspaper.

## Progress

- ◆ You can know how to make a sample by referring to No.3 experiment.
- ◆ Let's examine the seaweed using the illustrated book.
